

BANSHEE

Ex Terminal Box S3

The Banshee Ex Terminal Box S3 is a robust junction box that provides a safe enclosure for electrical connections and terminations, ensuring that potential sources of ignition are contained and minimized. Ideal for use in various underground and surface hazardous areas such as mining, petrochemical plants, and gas manufacturing and processing facilities, this unit is manufactured from high-grade mild steel. The mild steel parts are electroplated to enhance corrosion resistance, ensuring durability in challenging environments. Additionally, the terminal box features one M20 gland entry and two M25 gland entries, offering versatile installation options while maintaining safety and compliance.

PRODUCT CODE
BXTB400

NOTE: The IECEX, ATEX and UKEX certification is ONLY Certified for Underground Application

OUR PRODUCTS CARRY A **5 YEAR WARRANTY**
