

BANSHEE

Ex Start Station S3

The Banshee Ex Start Station S3 (Stop Station also available) is designed for safe operation of machinery and equipment in underground mining applications. Built within a durable flameproof enclosure, the unit houses a switch mechanism that activates equipment when the button is pressed. Available with either a green start button or a red stop button, it allows operators to select the configuration that best suits their control needs. Manufactured from high-grade mild steel with electroplated components, it delivers excellent corrosion resistance and durability in harsh environments. The push button assembly features three M25 gland entries for flexible installation while maintaining safety and compliance in critical settings.
