BANSHEE

Ex Start/Stop Station S3

The Banshee Ex Start/Stop Station S3 serves as a crucial safety control mechanism for underground mining operations, allowing operators to instantaneously stop or start equipment operations. Constructed within a flameproof enclosure, the unit houses two operators: a stop button for immediate shutdowns and a start button for controlled equipment activation. Manufactured from high-grade mild steel, the unit's electroplated parts ensure resistance to corrosion, enhancing its durability in harsh environments. Additionally, the push button features one M20 gland entry and two M25 gland entries, providing flexible installation options while maintaining safety and compliance in critical settings.
